

# Burhanuddin Ezzi

Hi, I am Burhanuddin, a Computer Science student at Habib University. In my 6-year-old passion for computers, I can undoubtedly say that I am a Computer geek. As a freshman student, I am interested in internships or voluntary work for a software-related job in any organization, where I can nurture my problem-solving and analytical skills.

Science, AKU-EB

## SKILLS

### Computer Programming:

3- Can do most tasks with some learning

2- Can do small tasks.

1- Fundamental knowledge

- Python (3/5)
- C/C++ (2/5)
- SQL (1/5)
- Git (3/5)

### Office tools:

- Can make presentations that look aesthetic and deliver what is important
- Can make outstanding Documents using WYSIWYG tools like Word and scripting tools like LaTeX

### Automation

Can use/write scripts for Windows Automation. Automation takes care of tedious tasks like finding similar documents in a drive and increases productivity.

## PROJECTS

### Select Images Containing A Face From A Folder

Using face-recognition module in Python which is built on dlib.

### Sudoku Game — *Python(Algorithms)*

This game is a Data-Structures and Algorithms course's final project. The GUI is made with pygame. As the game is very common, features are being added to make the game better.

### Student Database — *Python*

A project made for the introductory programming course at University. As the name suggests, the application consists of relevant features. The GUI is made with Tkinter.

## VOLUNTARY WORK

### Zero Food Wastage

2019 - Present

Part of a work force that saves 5000+ fresh meals from going to waste each year, by packaging and distribution.

### IT help for Adults

2022

Part of an organization that volunteers for technical guidance to adults.

## Creativity

Have the skills for designing social media and advertisement posts
